SUMMARY

MCA student specializing in Cloud Computing and DevOps with hands-on experience in AWS, Docker, Linux, Git, and CI/CD fundamentals. Built multiple cloud-based academic projects involving secure data sharing, face recognition, and cloud deployment. Passionate about cloud infrastructure, automation, containerization, and DevOps practices. Seeking an entry-level Cloud Engineer/DevOps Engineer/SRE role to contribute and grow in scalable cloud environments.

EXPERIENCE

UI/UX Designer

July 2023 – December 2023

Areksoft Technologies, Hyderabad, Telangana

- Designed responsive web and mobile interfaces using Figma with focus on usability and user experience.
- Collaborated with developers and cross-functional teams to translate requirements into functional designs.
- Created wireframes, prototypes, and user flows to improve application workflow and interaction design.
- Worked closely with development teams during implementation, testing, and design improvements.
- Participated in Agile workflows, feedback cycles, and iterative design enhancements.

PROJECTS

Cloud-Based Bookstore System 🔄

- Designed and developed a cloud-based bookstore management application with focus on scalability and accessibility.
- Implemented AWS EC2 for application hosting and AWS S3 for secure document and asset storage.
- Integrated MySQL database for efficient inventory management, user handling, and order processing.
- Applied modular development practices and version control using Git for maintainable application development.
- **Technologies:** AWS EC2, S3, MySQL, HTML, CSS, JavaScript, Git

Cloud-Based Secure Data Sharing Framework with Anti-Collusion Mechanism 🔄

- Designed and implemented a secure cloud-based data-sharing framework using access control mechanisms to protect sensitive information.
- Applied encryption and authorization concepts to prevent unauthorized access in multi-user cloud environments.
- Developed a secure data exchange approach supporting privacy, reliability, and controlled collaboration.
- Explored cloud security practices for secure storage and communication between users.
- **Technologies:** Cloud Computing, Data Security, Access Control, Encryption, AWS Concepts

Secure Cloud Solution for Multi-Face Recognition and Attendance Management 🔄

- Developed a cloud-integrated facial recognition attendance system for automated user identification and tracking.
- Implemented face recognition techniques to reduce manual attendance processes and improve efficiency.
- Integrated database storage for maintaining attendance records with secure cloud-based management.
- Focused on automation, accuracy, and scalable deployment of recognition-based applications.
- **Technologies:** Python, Face Recognition, Cloud Computing, Database

Skin Lesion Classification Using YOLOv8 🔄

- Developed a deep learning-based skin lesion classification system using YOLOv8 for automated analysis of dermatological images.
- Implemented image preprocessing and model-based classification to identify different categories of skin lesions.
- Applied computer vision and deep learning techniques to support efficient and automated skin lesion analysis.
- Evaluated model performance using classification metrics to assess prediction accuracy and reliability.
- **Technologies:** Python, YOLOv8, Deep Learning, Computer Vision, Image Processing

TECHNICAL SKILLS

- **Cloud:** AWS EC2, AWS S3, IAM, VPC, Cloud Computing Fundamentals
- **DevOps:** Docker, Git, GitHub, CI/CD Concepts, GitHub Actions (Basics)
- **Operating Systems:** Linux (Ubuntu), Shell Scripting, Bash
- **Programming:** Python, Java, JavaScript (Basic), HTML, CSS
- **Database:** MySQL, Database Management Systems
- **Tools:** VS Code, Git, Docker Desktop, Figma, Postman
- **Soft Skills:** Problem Solving, Analytical Thinking, Collaboration, Adaptability, Quick Learning, Time Management, Documentation, Agile Collaboration

EDUCATION

Master of Computer Applications (MCA) – CGPA: 9.0/10

August 2024 – August 2026

Deccan College of Engineering & Technology, Hyderabad

Bachelor of Computer Applications (BCA) – CGPA: 8.6/10

May 2021 – May 2024

KL University, Hyderabad

COURSES & LEARNING

- **Cloud Computing Fundamentals**
- **AWS Cloud Fundamentals**
- **Python Programming**
- **DevOps Fundamentals**
- **Linux / Shell Scripting Fundamentals**

ACHIEVEMENTS

- Successfully completed multiple cloud and programming certifications focused on AWS, DevOps, and software development.
- Developed and implemented cloud-based academic projects involving AWS services, security, and automation concepts.
- Maintained strong academic performance with a current MCA CGPA of 9.0/10.
