SUMMARY

MCA student specializing in Cloud Computing and DevOps with hands-on experience in AWS, Docker, Linux, Git, and CI/CD fundamentals. Built Flask applications involving authentication, databases, Amazon S3 integration, security controls, attendance management, and machine-learning inference. Interested in cloud infrastructure, automation, and containerization, and seeking an entry-level Cloud Engineer, DevOps Engineer, or SRE role.

EXPERIENCE

UI/UX Designer

July 2023 – December 2023

Areksoft Technologies, Hyderabad, Telangana

- Designed responsive web and mobile interfaces in Figma with an emphasis on usability and consistent interaction patterns.
- Collaborated with developers and cross-functional teams to translate requirements into wireframes, prototypes, user flows, and functional designs.
- Supported implementation, testing, and iterative design improvements through Agile feedback cycles.

PROJECTS

Cloud-Based Bookstore System 🔄

- Developed a modular Flask bookstore application with authentication, inventory, cart, checkout, and order-management features.
- Integrated Amazon S3 with Boto3 for book-cover storage, configured SQLAlchemy for SQLite/MySQL environments, and designed an AWS EC2 deployment architecture.
- **Technologies:** Python, Flask, SQLAlchemy, MySQL, SQLite, AWS EC2, Amazon S3, Boto3, HTML, CSS, JavaScript, Git

Secure Data Sharing Framework with Anti-Collusion 🔄

- Built a role-based data-sharing application with bcrypt password hashing, server-side sessions, group membership controls, and audit logging.
- Implemented per-file AES-256-GCM encryption and group key-epoch rotation that re-wraps file keys after member revocation.
- Verified tamper detection, active-member access, password rejection, and revoked-member denial using automated Node.js tests.
- **Technologies:** Node.js, JavaScript, AES-256-GCM, bcrypt, HTML, CSS, JSON persistence

Attendance Management and Recognition Workflow Prototype 🔄

- Developed a Flask attendance-management prototype with student registration, attendance tracking, dashboards, reporting, and automatic date/time recording.
- Implemented browser camera access, a simulated recognition workflow prepared for future computer-vision integration, and SQLite-based persistence.
- **Technologies:** Python, Flask, SQLite, JavaScript, HTML, CSS, Web MediaDevices API

Skin Lesion Classification Using YOLOv8 🔄

- Developed an educational Flask application using a fine-tuned YOLOv8 Nano model to classify dermoscopic images across nine skin-lesion categories.
- Created reproducible training and inference workflows with upload validation and configurable model loading; achieved 48.3% top-1 and 93.2% top-5 validation accuracy.
- **Technologies:** Python, Flask, YOLOv8, PyTorch, Computer Vision, Deep Learning

TECHNICAL SKILLS

- **Cloud:** AWS EC2, Amazon S3, IAM, VPC **DevOps:** Docker, Git, GitHub, CI/CD, GitHub Actions fundamentals
- **Operating Systems:** Linux (Ubuntu), Bash, shell scripting **Databases:** MySQL, SQLite
- **Programming:** Python, Java, JavaScript (basic), HTML, CSS
- **Frameworks/Libraries:** Flask, SQLAlchemy, Boto3, YOLOv8, PyTorch
- **Tools:** VS Code, Docker Desktop, Postman, Figma

EDUCATION

Master of Computer Applications (MCA) – CGPA: 9.0/10

Deccan College of Engineering & Technology, Hyderabad

August 2024 – August 2026

Bachelor of Computer Applications (BCA) – CGPA: 8.6/10

KL University, Hyderabad

May 2021 – May 2024
